

SW NewEnergy, LLC

COMPANY OVERVIEW

2024 | Confidential

OVERVIEW

SWNE has been a leader in business for over 70 years. To keep a successful business, we use foresight to explore new opportunities, and industry needs in an ever-changing business landscape. That innovation along with top-notch, experienced personnel led to SWNE Services - unmatched energy construction services.

We have our own management and crews to perform a multitude of services, including complete midstream construction services, power generation systems, CNG systems, chemical handling & storage, refining and Petro chemical plants. These capabilities allow us to complete heavy process related construction from simple sand plants to complex gas processing facilities. We also complete turnkey facilities worldwide to meet our clients' specific needs.

SWNE is committed to safety and quality without compromise. We have the people and policies in place to maintain our excellent safety and quality standards. We participate in ISNetworld and continually strive to maintain an "A" rating for every client, proving the strength of our safety plan, and insurance coverage. We subscribe to Veri force to certify and track our employees' certifications, skills, and evaluations. Our daily goal is for our personnel to thrive and deliver our clients the highest quality workmanship.

OUR VISION

To be the “Best in Class” turnkey sustainable solutions provider of mechanical, process piping, I&E Electrical, Field service & fabrication & installation.

OUR MISSION

SWNew Energy is dedicated to being a “premier” Manufacturer & Installation Construction contractor of Gas process Plants, Electrical I&E systems critical to the Energy sector, including the following:

Oil & Gas | Renewable Energy | Crude Storage

I & E & Mech | Turnaround Management | Compressor Stations

As the SW New Energy Organization continues to evolve, our team strives to provide the highest quality and service, with the safest and most innovative solutions.

Our outstanding quality management is dedicated to providing exceptional value and dependable on-time performance by adhering to high quality safety and design standards so that we may develop a customer relationship for a lifetime.

SERVICES OVERVIEW

EPC Services

Year of Experience in industry, strong partnerships, strong supplier relationships & Highly skilled workforce.

Power Generation

Biomass, Combined cycle, natural gas reciprocating, Natural gas Turbine.

Instrumentation & Electrical I&E

Power Generation, Power distribution systems (Medium & Low voltage), PLC & DSC systems, Commissioning & Start up services.

Plant Construction

Saltwater Disposal, Bulk Cement, Acid, Sand, Liquid Mud & Wastewater

Oil & Gas Processing Facilities

Slug Catchers, Compressor Stations, Meter Stations, Interconnect Systems, Dehydration Systems, NGL Recovery, Phase Separation, CO₂ Flooding, CO₂ Injection, CRYO, Amine & LNG/CNG

Crude Facilities

Crude Pump Stations, Crude Storage & Crude Rail/Trucking Facility

Oil & Gas Refining

Construction Services, Maintenance, Turnaround Management

INDUSTRIAL & MANUFACTURING SERVICES

SWNE offers expertise in complex industrial projects. We offer a broad spectrum of experience ranging from simple sand plants to complex cement blending and grinding facilities. By combining our 3-D modeling capabilities with our years of expertise in the industrial industry, we have repeatedly demonstrated we can successfully design, fabricate, and construct these complex projects on time and under budget. Our services include:

EPC/EPCM, Site Development, Turnkey Designs, Power Generation, Boiler & Chiller Systems, Cooling Towers, Turnarounds, Shutdowns Wastewater Treatment

SWNE has built a strong reputation in the aggregate, bulk cement, acid and frac sand plant industries. With the successful completion of numerous facilities, we have established ourselves as a leader in this market by providing custom PLC plant automation, 3-D modeling, and on-time/on-budget execution, resulting in quicker times to market.

IN HOUSEWORK

Millwrights, Piping, Structural Steel Fabrication & Erection, Welding, Mechanical, Concrete, Foundations & Equipment setting & installation.

MATERIAL HANDLING

Dry, Bulk & Liquid

FACILITY EXPERIENCE

Plastics, Food, Beverage, Steel, Fiberglass, Concrete, Wire, Aerospace, Automotive & Mills.

ELECTRICAL I&E

SW New Energy provides a complete range of electrical, instrumentation, automation, measurement, and communications services for a broad range of clients in the oil and gas industry. Our technicians can install and maintain almost any type of electronic flow meter. We also specialize in compressor stations and saltwater disposal stations.

Distribution projects involve new construction, system improvements, and complete rebuilds. Our experienced workforce is equipped and competent to work energized voltages from 4kV –34.5kV. We pride ourselves on being a utility service company providing professional services to electrical utility companies. We concentrate on safely transporting electricity from the source of generation to its destination, whether business or residential. With our extensive knowledge of the oil and gas industry, SWNE E&I provides timely solutions with quality workmanship.

SW New Energy Electrical & Instrumentation services include design, installation, and maintenance of:

- Conversion of pneumatic to electronic computer control systems of different assortments
- Installation of instrumentation and electrical on “grass-roots” plants
- Field installations of electrical distribution systems of any size
- Revamping and relocating compressors or skid-module plants
- Modifications and expansions of broad range instrumentation and electrical systems
- Assistance of skid fabrication and modular equipment packaging companies with instrumentation and electrical
- Plant and facility automation and technical support

SERVICES

GAS PROCESSING & STRUCTURAL

Vessels
Separators
Stairways
Platforms
Walkways
Mixer Bridges
Mezzanines
Control Boxes
I&E
Insulation & Heat Trace

CHEMICAL & WATER

Degasification Skids
Transfer Panels
Process Chilled Water
UHP Storage and Distribution
Chemical Mixing
Systems
Wastewater
Collection Systems
Exchangers
Valve Manifold Boxes
Gas Panels & Sticks

ENGINEERED SKID SYSTEMS

Clean in Place (CIP)
Filtration
Transfer Panels
Manufacture Structural
I&E
Field Maintenance
EPC & Engineering

SW NEWENERGY, LLC

SERVICES

PIPEFABRICATION

- • Industrial Piping Systems
 - Large Bore Carbon Steel, Stainless Steel, Alum, Nickel, Chrome, Hastelloy, Inconel, Fiberglass, Poly
- SMAW, GMAW, FCAW, GTAW, SAW, TIG, MIG
- Degasification Skids
- Sub-Assemblies
- Class 10 Clean Assembly
- UHP Fabrication

ELECTRICAL

- • • Service and Repair
 - Panels / MCC
- • Enraf
 - Hot Work
 - Overhead & Underground
 - MCC's/Switchgear
 - Heat Tracing & Transformers
- • • Automation & Control Systems
 - Low & High Voltage wiring installation & Testing.
- • Cable Tray & Conduit
 - Installation
 - Lighting & Lighting Protection
 - Grounding
 - Power & Light Panels
 - Electrical Equipment
 - Installation

SW NEW ENERGY ADVANTAGE | QA/QC

- Standard Operating Procedures
- Quality Manual (Industrial, Energy)*
- Safety Manual
- Hydro / Pneumatic Testing
- Nonconformity & Corrective Actions
- Welding procedures

FABRICATION & I&E OVERVIEW

OUR ADVANTAGE: PRE- CONSTRUCTION & DESIGN- ASSIST

Our team offers a full range of design-assist and cost estimation services to help our client optimize the facility design and physical layout specifically as it relates to the mechanical, process, electrical services.

Our design-assist team utilizes the latest design/BIM software integration to ensure that our partners achieve the greatest return on investment at the lowest possible costs. We do this through a systematic team approach; which integrates our partners' best practices with our team's standardization of design methods, materials and operational procedures, along with our extensive knowledge in cost estimation services. As part of our continuous improvement efforts, the SWNE “One” design-assist and preconstruction teams work jointly with our clients to identify ways to improve operational efficiencies.
